BEFORE POTENTIAL FLOODING

PREPARE EARLY

Prepare a 'Go Bag'

with non-perishable food, water, medicines, clothing, flashlights, batteries, cash, and important documents (e.g. passports, IDs, conveyance papers etc.) in a waterproof container.

Know your evacuation routes

Plan your evacuation route and identify your nearest hurricane shelter.

Secure your home and property

- ▶ Protect important documents by placing them in a waterproof pouch or container.
- ▶ Put small electronics up high on a shelf or on top of tall furniture.
- ▶ Place sandbags or barriers around doors and low-lying entryways.

Protect your vehicle

Avoid parking near trees, power lines, or flood-prone areas.

Stay informed

Stay informed through official news and DRM Authority updates.

Leave flood-prone areas early if authorities advise evacuation.

Never allow children to play in flood water.

IF FLOODING OCCURS

PROTECT YOURSELF, DON'T TAKE CHANCES

Do not walk, drive, or swim

through flood waters — even shallow water can hide hazards like live wires or debris.

Turn off your main power breaker and disconnect gas lines, if it's safe to do so.

Move to the highest safe level of your home if flood waters begin to rise.

Follow evacuation orders issued by authorities without delay.

RETURNING HOME SAFELY

RETURN CAUTIOUSLY

Return home only after the authorities have determined that your area is safe.

Do not turn the power back on until your home's electrical system has been inspected by a qualified electrician.

Document all damage to your property and belongings with photos before cleaning.

Clean and disinfect all surfaces, furniture, and clothing exposed to flood water.

Check your car for water damage before driving. If the engine or interior was submerged, have it inspected before use.

Seek help from your local disaster office or community centre if you need assistance with repairs, relief, or insurance.
